# AESTHETIC DESIGN

Door handles by Estonian designers 2016 / 2017

## VAL73

The main keyword describing the VAL73 door handle is ergonomics. After grabbing it, one quickly realises how handy it really is! A door handle with soft lines, best suited for environments where the historic and modern are found coexisting side by side.

DESIGN Aap Piho

- Handles are suitable for use indoors
- Selection of surface coatings: black, stainless tone, chrome satin, chrome, brass satin, brass, copper coat tone and white
- Standard Scandinavian mounts

## VAL75

The VAL75 door handle has a somewhat cooler line, although it is more detailed and also more complex technically, utilising, for example, a base plate with concealed attachments.

Ergonomics is also the most important keyword in the case of this door handle. A universal handle in the most positive sense of the term; well-suited to different environments.

DESIGN Aap Piho

- The handle is suitable for use indoors
- Selection of surface coatings: black, stainless tone, chrome satin, chrome, copper coat tone
- Standard Scandinavian and European mounts

## VAL13

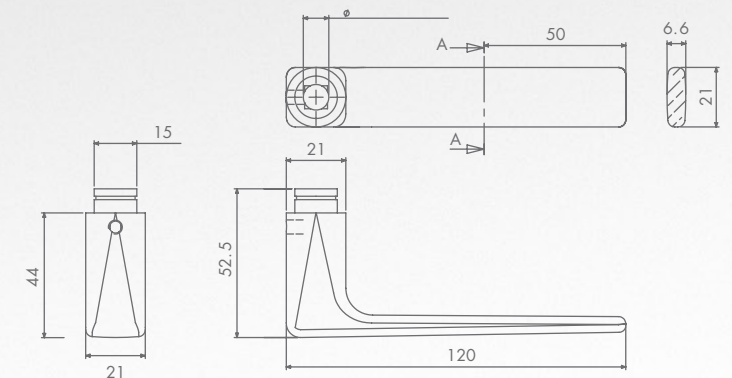

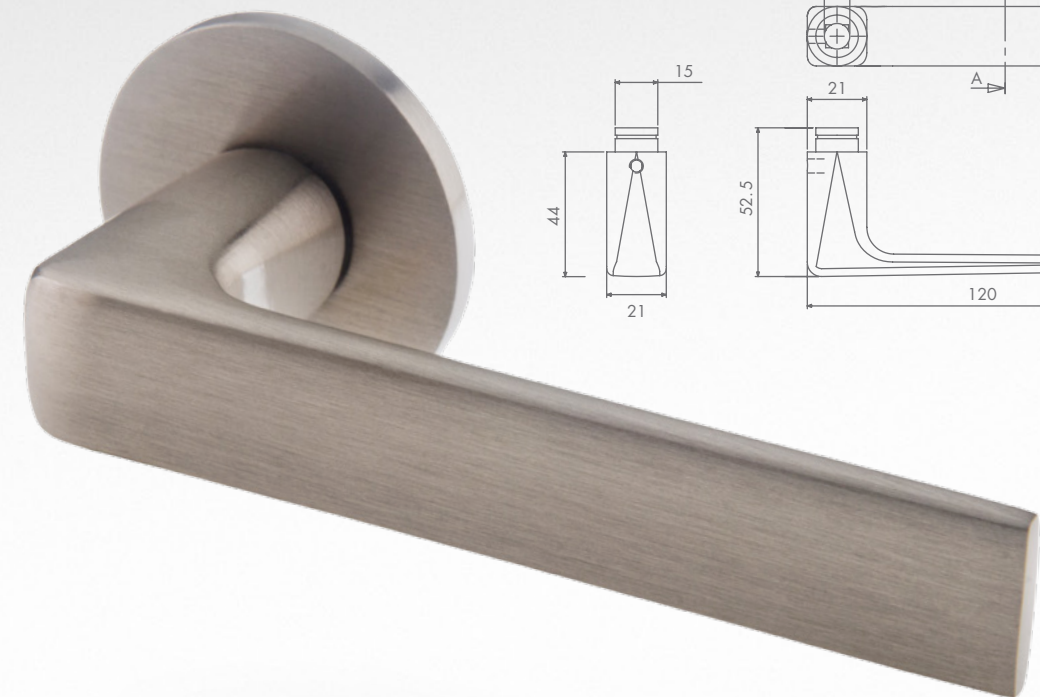

The VAL13 door handle is well-suited for a massive exterior door. The handle is characterised by a powerful style, one that is popular at the moment in the Nordic countries. Surface coating selection: brass satin and chrome satin. Can also be ordered with other surface coatings. Product is available as a special order and can be ordered with a European or Scandinavian mount.

## VAL5

The VAL5 door handle can be used as a partner for the VAL13 link on the inside of an exterior door. It is also well-suited for other interior doors. Surface coating selection: chrome satin, chrome, stainless tone. Can also be ordered with other surface coatings. Selection includes links with European and Scandinavian mounts for locks.
